SATAKE CORPORATION

The Satake Rice Polishing Machine KB cleans the surface of rice, significantly enhancing the quality of finished products. The machine has achieved a high reputation in many countries for its high performance and for the innovations which have been incorporated over the past 25 years.

FEATURES:

1. Improves the appearance of rice:

The surface of milled rice becomes smooth and clean, leading to enhance commercial value.

2. Improves the quality of rice:

The residual bran absorbs moisture and helps microorganisms to develop. By removing this residual bran, The Satake KB gives rice a longer shelf life.

3. Gentle polishing:

The Satake KB is designed to minimize breakage of rice kernels. Milling rolls and screens are chosen to best fit the material.

4. Wide applications:

Combination with other Satake milling equipment enables application to wide varieties of rice.

5. Large Capacity

Combination of upper chamber for mixing with mist water and lower chamber for polishing, the capacity has increased almost double, compared with KB40G-TA.
